SUMMARY

Hi! I am an engineer, economist, and self-taught software developer. After working as an economist at a multinational company, I returned to engineering and am pursuing an MSc in Environmental, Process and Energy Engineering at MCI Innsbruck, focusing on hybrid membrane technology, CFD and practical process engineering challenges in the industrial automation industry. I like to be busy in my free time and I always find ways to improve myself.

EXPERIENCE

Co-founder — Linecept

2026 – present

Building a visualization-first project management platform so teams can actually see the work and oversee the process.

Co-founder & General Manager — Outsider Skis

2025 – present

Inventing the future of skiing.

Founder & Full-Stack Developer — Bioversee

2024 – 2026

Web-based automation for industrial equipment, cloud control integrations, and database tooling for process control and optimization.

Talent Program Intern — K&H Bank

2024 – 2025

Rotational program across Private Banking and Corporate Finance. Strong analytical, teamwork, and problem-solving work on initiatives including the "Bank Branch of the Future" and "1 Million Project".

EDUCATION

MCI Management Center Innsbruck

In progress

MSc, Environmental, Process and Energy Engineering

Thesis: TBD

University of California, Berkeley

2026

Entrepreneurship and Leveraging AI summer courses

University of Debrecen

2025

BSc, Marketing & Commerce

Thesis: Bioversee — A Startup for Industrial Automation

University of Debrecen

2023

BSc, Bioengineering

Thesis: Use of *Saccharomyces bayanus* and *S. pombe* in cider making

TECHNICAL SKILLS

Python

HTML

CSS

React

Vercel

Supabase

MATLAB

Simulink

Aspen Plus

Shapr3D

Blender
